INFORMATION SHEET

Yomaxx Yoghurt Soft Serve

This powder mix has been designed to make a high quality, smooth tasting frozen yoghurt product. It has been formulated to perform and compare very well against other major brands when used according to the following instructions. When combined with fresh fruit or fruit syrups the results are delicious, and more healthy and upmarket than standard soft serve with plain syrup toppings. We also offer a customised option to include high levels of probiotic bacteria within our powder; though this adds cost – it is a powerful marketing tool.

This product can also be used as a base for sundaes, flurries, frappes, thick shakes, milk shakes and as a dessert topping, or as a base to produce your own flavoured frozen yoghurt.

Directions For Frozen Yoghurt: Add 3.5 litres of pure water to the mixing vessel and then add the frozen yoghurt powder (1.5kg) sachet. Mix in a food-grade bucket with a long (40cm) wire whisk for 1 minute, until mix is completely dissolved. Allow 5 minutes before giving a final whisk, then add to the ice cream machine hopper.

Consumers have accepted that consumption of Yogurt on a daily basis is a positive step for their health. Yogurt is a vibrant sector of the retail food market and subject to constant innovation and improvements. It is particularly noted for quick adoption of novel ingredients that benefit the consumer's health. Our product is unique in that it carries many of these benefits seen in supermarket products to the foodservice business - in a new and exciting way.
